CHANGE FOR GLOBAL CHANGE helps to build a community garden in Brazil. *Education for Life*

With a grant from CGC, the group purchased needed supplies to irrigate the gardens using rainwater

Families worked together to dig irrigation ditches and plant the gardens

The families are not only enjoying fresh organic produce, but they are using the ideas they learned to create small gardens at their homes

Forty low-income families served by the Tabor community gathered to learn about environmentally sustainable ways of creating a community garden
